

We are striving for more:
More information, more influence, more value.

**PERFORMANCE PARAMETERS
STATUS MESSAGES
AVAILABILITY AND
VALUE PRESERVATION
CONSUMPTION VALUES
MACHINE COCKPIT**

Always have the right data
at the right time

Industry 4.0 offers enormous potential for increasing your competitiveness. The most important aspect is the transparency of relevant information. In this way, you receive a complete overview of your fleet and therefore your capital.

We support you in taking the next step into a digital future with a completely new form of fleet management – the Putzmeister Machine Cockpit.

This info hub is user-friendly and provides you with all important machine data in real time. The process is fully automated in order to relieve the load on the driver and prevent incorrect entries.

NEW: As a new feature, you can now link the data to your existing system

Your advantages

- **Less downtime**
Warnings for critical conditions, remote diagnosis of machine faults and optimal planning of maintenance
- **Higher productivity**
Real-time information, overview of all relevant key figures and exclusive industry comparison
- **Increased safety**
Warning when leaving the working ranges and possibility of analysing past jobs
- **Fewer discontinuations of construction site work**
All information for the support variants used. More variants means fewer discontinuations.

Machine Cockpit

Real-time information
The construction-site status of your vehicles is visible in real time, allowing you to stay organised more easily as you always receive up-to-date information on their set-up site and work progress.

Remote Service
You are notified of critical machine conditions. Remote diagnosis helps all those involved to identify faults and implement appropriate measures.

Data analysis
Key figures for delivery rate, support variants, machine use and fuel consumption enable you to reduce unproductive times, wear and fuel consumption across your fleet.

CO₂ Kalkulator
Obtain CO₂ values quickly and easily with an automatic calculation based on machine data.

E-mobility made easy
Keep an eye on the charging status, remaining range, consumption and battery condition at any time and wherever you are.

Important information you do not want to miss!

You want:

- Maximum utilisation and availability?
- Increased machine efficiency?
- Increased safety for your personnel and machine?
- Avoid discontinuation of construction site work?

It's as easy as this:

1. Register on MyPutzmeister
2. Request access via the "Machine Cockpit" tile
3. Get started straight away!
