

Putzmeister

Putzmeister BSA 1407D CLASSIC

Reliable Performance | Easy to Operate | Lifelong Savings

Simple, High-Performance Pumping

Putzmeister has over 60 years of experience in being a leading solution provider for pumping, mixing and placing concrete, mortar and industrial solutions. And when it comes to Stationary Concrete Pumps, Putzmeister is renowned for delivering pumps that outperform both in vertical and horizontal pumping. Putzmeister's range of Stationary Concrete Pumps have worked on some of the most challenging jobsites around the world – these pumps regularly set and break their own world records.

The ingenious geometry of Putzmeister concrete pumps ensures delivery of even heavy grade concrete at high output rates without requiring the installation of additional equipment. Durable delivery pistons, standard chrome-plated delivery cylinders and the S transfer tube designed by Putzmeister enables the machines to withstand long periods of intensive use and helps owners enjoy a lower total cost of ownership.

BSA Classic Stationary Concrete Pump Benefits At A Glance

- High-Performance Pumping
- Simple Operations
- Easy to Maintain
- Lifelong Savings
- Long Machine Life
- High Resale Value

High-quality wear components ensure machines have a long service life

The S-Valve for Placing Difficult Concrete

- The S-Valve that is manufactured out of thick-walled special cast steel is designed for difficult, abrasive concrete
- The automatic wear ring compensates for the uniform wear of parts and prolongs service life
- The wear ring optimally seals the system, preventing the bleeding of concrete fines and reducing the danger of blockages
- All parts of the S-Valve are easy to change, no need to dismantle the hopper

Simple Controls, Easy to Operate and Manage

- Easy to master, hydraulic controls
- Adjust output conveniently with Variable Output Control
- Centralized Greasing System keeps wear parts lubricated
- Hydraulic block housing protects against the elements
- Minimize machine downtime with emergency bypass

Designed to Deliver Value

Convenient to Maintain

- Easy access to all machine parts
- Fewer, easy to replace components
- Hopper designed for convenient cleaning
- Long Service Intervals

More Productivity, Improved ROI

- Reliable high-performance pumping
- Long wear life of parts and long service intervals deliver savings
- Fewer, easy to replace components
- Robust build ensures long machine life and a highest in class resale value

BSA 1407 D Classic Technical Specifications

Description	BSA 1407 D Classic
Output up to	72/48* m ³ /h
Concrete Pressure up to	65/97* bar
Delivery Cylinder dia./stroke	200/1400mm
Strokes / minute (max. theoretical)	27/18*
Control System	VHS
Drive Unit Power	74 kW (Diesel)
Hopper Capacity	600 L
Transfer Tube	S 2018 PN
Weight	4300 kg

*Values for hydraulic fluid being fed to piston side

Putzmeister
Genuine Service
and Parts

#1 reason customers choose Putzmeister
AFTERSALES SUPPORT

Your Putzmeister Machine is in the best hands with our team. We ensure a high level of service, maintenance and genuine parts; we take care of your machine like no one else. Why? **We know your machine better than anyone else!**

Trained service experts ensure correct diagnosis and service

Genuine Putzmeister spare parts for long wear life and superior performance

Operations and maintenance solutions for Peace of Mind

Service expert allocated on time for uninterrupted operation

Annual maintenance/ service contracts for extended machine life
