EXCEPTIONAL REACH IN A LIGHTWEIGHT DESIGN

The 32Z-Meter boom pump offers a reduced weight, streamlined design, and allows for easier servicing. The boom pump weighs over 3,000 pounds less than the previous model, which results in an increased payload capacity for job site equipment, water and fuel. Additionally, the model has a three-axle chassis, so it meets federal bridge requirements and requires less strict permits.

The pipe layout has been improved and the parts commonality between components of the pipe system has increased. The simplified pipe design results in reduced wear and provides an easier concrete flow. The Ergonic® Graphic Display features wireless computer technology and a high resolution, color screen, which enables the operator to set parameters that control the boom, pump and other functions. This helps to increase the convenience, performance and overall ease-of-use of the boom pump.

A NEW STANDARD OF INNOVATION AND EXCELLENCE

HIGHLY EFFICIENT HYDRAULIC OIL SYSTEM

The hydraulic system on the 32Z-Meter has an improved filtration system, uses less oil and has fewer parts. Cleaner oil improves pump functioning and reduces maintenance intervals.

IMPROVED PIPE LAYOUT

Improved pipe layout, with single bend in turret and only two elbow sizes – 45-degree and 90-degree – increases parts commonality and reduces wear.

FLEXIBLE PEDESTAL

By improving the pedestal construction with a bolt connection and simplifying the turret design, you can count on less down time and lower maintenance costs.
FREE FLOW HYDRAULICS IN A CLOSED LOOP SYSTEM

The pumps at the heart of Putzmeister’s free flow pumping system are bi-directional, variable displacement piston pumps. Depending on stroke, oil flows in a closed loop from either port A or port B on the pump to the hydraulic cylinders.

Depending on the specific pump cell size, up to 20% of the oil leaves the simple closed loop system during each stroke through a flushing valve on the main pump and cycles to a cooler before it returns to the hydraulic oil tank.

Unlike an open loop system, the oil flows freely without passing through any unnecessary valves that can generate heat. Thus, the closed loop requires far less oil to run the system, as a larger reservoir is not necessary to cool all of the oil. In addition, return oil can be cycled directly through the main kidney filter instead of going back to the tank, keeping it in the filtered state preferred by the hydraulic components for long life and dependable operation.

Speed and timing are also critical to superior performance. Quicker and more responsive than a hydraulic signal, the electrical system on a Putzmeister pump minimizes the time it takes to change direction at stroke end. An electrical signal precisely synchronizes the drive cylinders with the accumulator system that controls the S-Valve in the hopper. Reserved energy stored in a nitrogen bladder is sent as a supercharged blast of oil at precisely the right moment to facilitate a smooth and fast shift of the S-Valve from one position to another.

KEY ADVANTAGES OF PUTZMEISTER’S FREE FLOW HYDRAULICS

• Changes in material pressure in the delivery line are reduced to ensure smooth pumping and a consistent concrete flow.
• The intelligent design minimizes wear-inducing pressure peaks, increases service life and makes our pumps extremely powerful.
• Rapid change-over of the stroke means higher outputs, a smoother flow of concrete and less boom bounce.
• There is greater pump output due to the efficient use of all available energy.
### 32Z-Meter | Truck-Mounted Concrete Boom Pump Standard Features

**BOOM**
- 106' 0" (32.30m) vertical reach
- Low unfolding height
- Versatile 4-section Multi-Z boom
- Manual lubrication, optional auto lubrication
- Integrated work lights

**BOOM OPERATION AND CONTROL**
- Fully proportional HBC radio remote
- Smooth and precise boom positioning at greater distances
- Fully proportional remote with 130' 0" (40m) cable
- Gauge Port Central (GPC)
- Modular Boom Controls (MBC)
- 24V electrical system

**DELIVERY LINE**
- Equipped with 5" (125mm) delivery line on all boom sections providing efficient concrete delivery
- Bolt-on easy lift-out brackets for simple delivery line replacement
- Standardized 45° and 90° elbows and straight pipe sections
- Improved pipe layout reduces pipe wear
- Common component availability and easy replacement

**PEDESTAL**
- Rotation bearing and access openings simplify turret pipe changes
- Sub-frame’s bolted connections absorb all forces
- Easy access large single-suction filter with indicator gauge
- Efficient hydraulic oil system
- Condensation trap in the hydraulic tank for water collection
- Increased deck space and payload capacity for pipe and hose storage
- Manual lubrication, optional auto lubrication
- Side-mounted aluminum toolboxes
- Integrated work lights
- Breakaway rear steps

**OUTRIGGERS**
- Two-part outriggers for easy maintenance
- Quick setup on restrictive job sites
- Fully hydraulic outriggers with integral cylinders
- “X” brace outrigger system
- Front outriggers extend diagonally out and down
- Rear outriggers swing out and extend down
- Four outrigger pads in two side compartments
- Bubble level indicators
- Optional auxiliary fuel tank
- Optional One-Sided Support (OSS) outriggers 120°

**CONCRETE PUMP**
- Ergonomic® Pump System (EPS) with color Ergonomic Graphic Display (EGD)
- Free flow hydraulic system for smooth, controllable pumping
- Multi-piece piston cup design
- Hard-chromed material cylinders
- Redundant proximity sensor system with function indicators
- Fully adjustable volume control for very slow pumping with full concrete pressure and boom speed
- Modular pump control box

**EZ CLEAN OUT RS 909 HOPPER**
- Large 19.4 ft³ (550L) capacity
- Grate-mounted vibrator
- Multi-piece grate featuring bolted connections
- Hopper grate RFID safety switch
- Hinged splash guard covers hopper during transit
- Lower hopper height allows easy discharge from ready mix truck
- Automatic lubrication
- Hopper work light

**S-VALVE**
- Ideal for high pressure applications and harsh mixes
- Hard-faced S-Valve
- Gradual 9" to 7" (230 to 180mm) reduction
- Thick-walled valve construction
- Lasting wear over years of use

**CLEAN OUT**
- Fast and easy clean out
- 406 psi (28 bar) hydraulically-driven water pump
- Wash out kit and hose
- Integrated 185 gallon (700L) water tank

---

**Putzmeister**

**PRO-VANTAGE® Warranty Plan**

The PRO-VANTAGE® Warranty Plan extends the coverage on all Putzmeister BSF boom pumps for a total of 36 months or 6,600 hours at no extra charge. Domestic only.
The computer-aided EPS constantly monitors and regulates the operation of the concrete pump and truck engine. The electronic regulation of this system means the pump always runs at peak performance. EPS results in more productivity and greater efficiency with less for the operator to worry about. The color Ergonic Graphic Display (EGD) provides EPS monitoring from one convenient location.

Putzmeister’s “smart design” boom incorporates welding seams below the edge of maximum stress. The new 3ZZ rectangle boom design minimizes boom bounce, and is easier for the hoseman to maneuver. The boom features more straight pipe for a less stressful concrete flow and longer wear on parts. The Multi-Z boom configuration handles space-restrictive areas and can pump even when the boom is not fully extended. Optimized for the greatest maneuverability and flexibility available, resulting in a larger operational range.

Putzmeister’s robust, yet lightweight EZ Clean Out RS 909 hopper is engineered for performance and durability. Offering 19.4 ft³ (550L) capacity, the hopper uses one mixer paddle motor and grate-mounted vibrator. The multi-piece grate features bolted connections that allow for easy maintenance. An innovative RFID safety switch incorporated in the hopper disables the machine when the grate is opened.

From pedestal construction and flatpack connections to pipe hanger brackets and hopper grate, many of the critical wear areas have been improved with bolt connections. Simplifying the design and allowing for torsion forces to easily pass through, the bolt connections provide extended service life and easier maintenance.

Switch gears and save with Putzmeister’s patented Econo-Gear™. The exclusive design allows the Mack chassis engine to run at a lower rpm, achieving less stress on wear parts, lower noise levels and reduced fuel consumption. Econo-Gear makes a significant impact on job site safety and profitability with an estimated 10-15% savings.
32Z-METER TRUCK-MOUNTED SPECIFICATIONS

Length 36' 5" (11.09m)
Width 8' 2" (2.45m)
Height 12' 10" (3.90m)
Wheelbase 233" (5,968mm)
Front axle weight 17,641 lbs (8,002kg)
Rear axle weight 33,352 lbs (15,128kg)
Approx. total weight 50,993 lbs (23,130kg)

Based on Model MACK MRU 613 with 32Z pump cell.
Weights are approximate and include pump, boom, truck, driver and full fuel tank.
Varies with options selected.
Dimensions will vary with different truck makes, models and specifications.

BOOM SPECIFICATIONS | MULTI-Z DESIGN

Height & Reach
- Vertical reach 106' 0" (32.30m)
- Horizontal reach 91' 10" (28.00m)
- Reach from front of truck 83' 8" (25.50m)
- Reach depth 67' 3" (20.50m)
- Unfolding height 24' 11" (7.60m)

4-Section Boom
- 1st section articulation 96°
- 2nd section articulation 180°
- 3rd section articulation 255°
- 4th section articulation 232°
- 1st section length 27' 11" (8.50m)
- 2nd section length 21' 8" (6.60m)
- 3rd section length 21' 8" (6.60m)
- 4th section length 21' 8" (6.60m)

General Specs
- Pipeline Size (ID) metric ends 5" (125mm)
- Rotation 365°
- End hose — length 10' 0" (3.00m)
- End hose — diameter 5" (125mm)
- Outrigger spread L - R — front 18' 0" (5.50m)
- Outrigger spread L - R — rear 22' 4" (6.80m)

PUMP SPECIFICATIONS 32Z.12H 32Z.16H
- Output — rod side 144 yd³/hr (110m³/hr) 210 yd³/hr (160m³/hr)
- — piston side 97 yd³/hr (74m³/hr) 146 yd³/hr (112m³/hr)
- Pressure — rod side 1,233 psi (85 bar) 1,233 psi (85 bar)
- — piston side 1,624 psi (112 bar)* 1,885 psi (130 bar)*
- Material cylinder diameter 9" (230mm) 9" (230mm)
- Stroke length 83" (2,100mm) 83" (2,100mm)
- Maximum strokes per minute — rod side 21 31
- — piston side 14 21
- Volume control 0-Full 0-Full
- Vibrator Standard Standard
- Hard-chromed material cylinders Standard Standard
- Hydraulic system Free Flow Free Flow
- Hydraulic system pressure 5,075 psi (350 bar) 5,075 psi (350 bar)
- Differential cylinder diameter 5.1" (130mm) 5.5" (140mm)
- Rod diameter 3.1" (80mm) 3.1" (80mm)
- Maximum size aggregate 2.5" (63mm) 2.5" (63mm)
- Water tank—pedestal 185 gal (700L) 185 gal (700L)

Maximum theoretical values listed.
* Applies to units mounted on PMA stock truck — MACK MRU 613
• Standard delivery line system rated at max line pressure of 1,233 psi (85 bar)
